

GDA Corp.

CropSignal[®] Tutorial: Overview

GDA Corp
2019

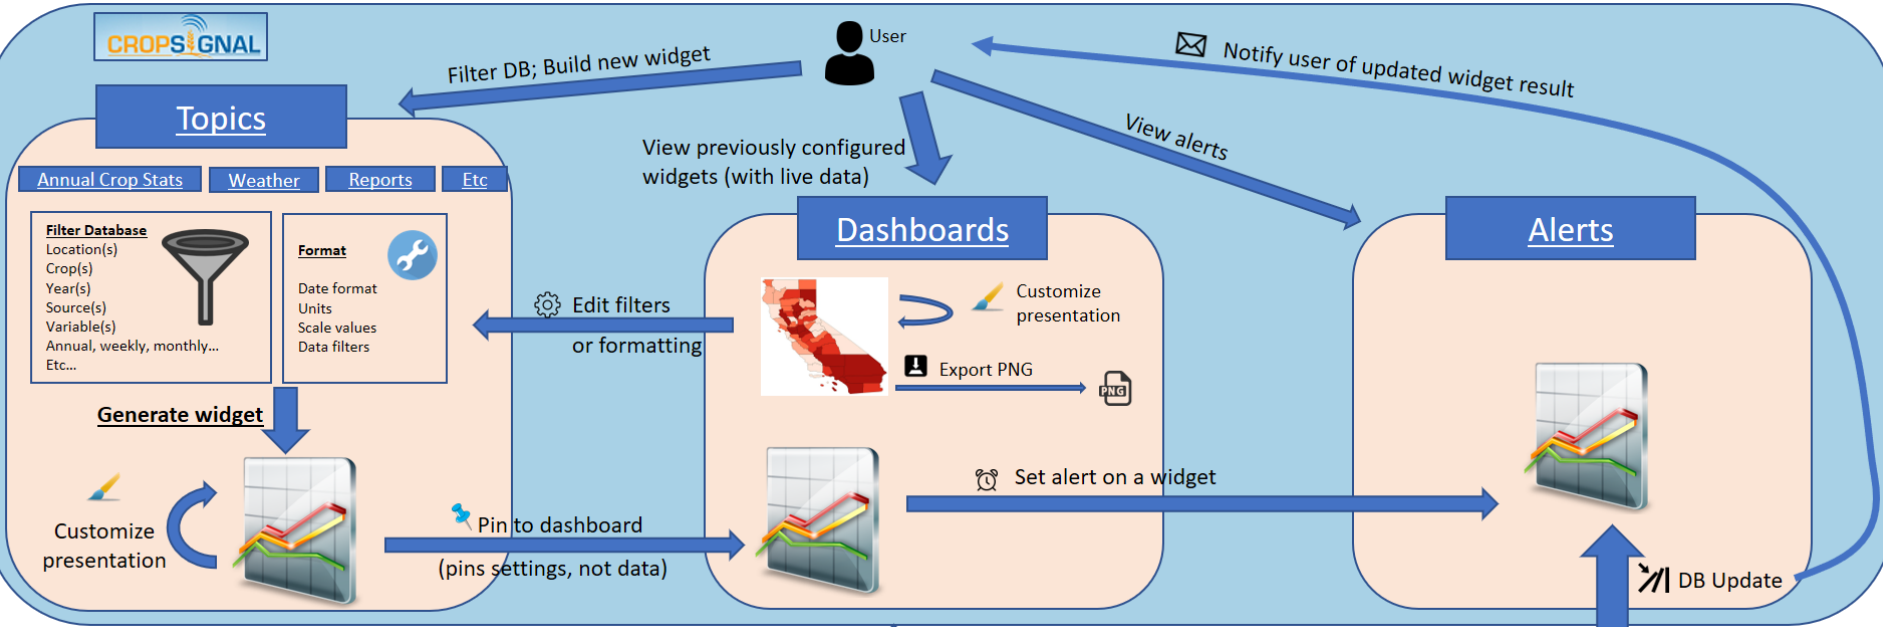

System Requirements

- CropSignal requires a modern edge browser
 - Edge 41+
 - Firefox 59+
 - Chrome 41+
 - Safari 9+
 - Opera 11+
- JavaScript and cookies must be enabled
- A screen resolution of at least 1440 * 960
- Support SSL with mixed content (since Webmarks may use http protocol)

CropSignal Architecture

GDA Corp.

Admin unit locations, crop names, and years are standardized across sources

Dashboards

- A collection of up to 20 widgets (a widget is a chart, map, table, or RSS feed, *etc*)
- Can be custom named with widgets organized thematically as user desires
- One dashboard is set to default (loaded when user clicks 'Dashboards' tab)
- Widgets on dashboard can be ordered and resized and also copied or moved between dashboards

Dashboard Index

CROPSIGNAL

Show All entries

Search:

	name	shared with	tags	created	links
⋮	Brazil NDVI	[not shared]		3 year(s) ago	Preview Open
⋮	Brazil	[not shared]		5 year(s) ago	Preview Open
⋮	NDVI examples	[not shared]		3 year(s) ago	Preview Open

You can drag and drop the dashboards into the order you desire, then click the Save Order button – that is the order they will appear in the dropdown.

You can also select one dashboard and **Rename** or **Set Default**.

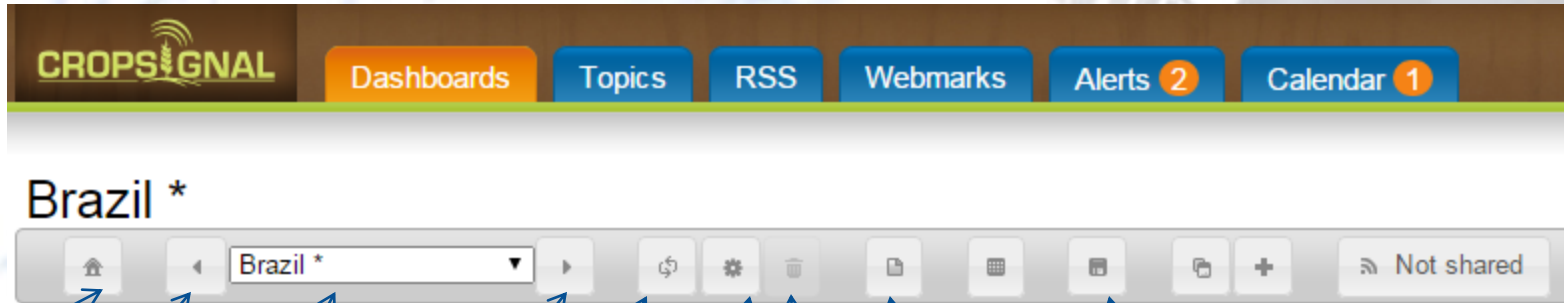

You can also select many dashboards and **Delete** (unless you have also selected the default dashboard which cannot be deleted)

You can select many dashboards and **Copy** to make duplicates or **Share** with other users

If someone has shared dashboards with you, they will appear here in a separate list and you can choose to add them to or remove them from your list of dashboards

Previous Next

Hold Ctrl/Shift while selecting rows to select multiple rows

- If another user has shared a dashboard with you, it will appear
 - In the second table on your dashboards index page (screenshot)
 - In your Dashboards select dropdown under the category 'Dashboards shared with you'
- If viewing a shared dashboard, you will see the '[shared by XXXXX]' appended to the dashboard title.
- The sharer can determine whether to give 'edit' and 'reshare' privileges with sharees
- Shared dashboards can be copied to 'My Dashboards' and then can be manipulated (even if not editable)

Shared Dashboards (cont'd)

If you have sharing privileges, you will see a button on your dashboard toolbar that says 'Not Shared' – if you click it a dialog will appear where you can select what users or groups to share your dashboard with.

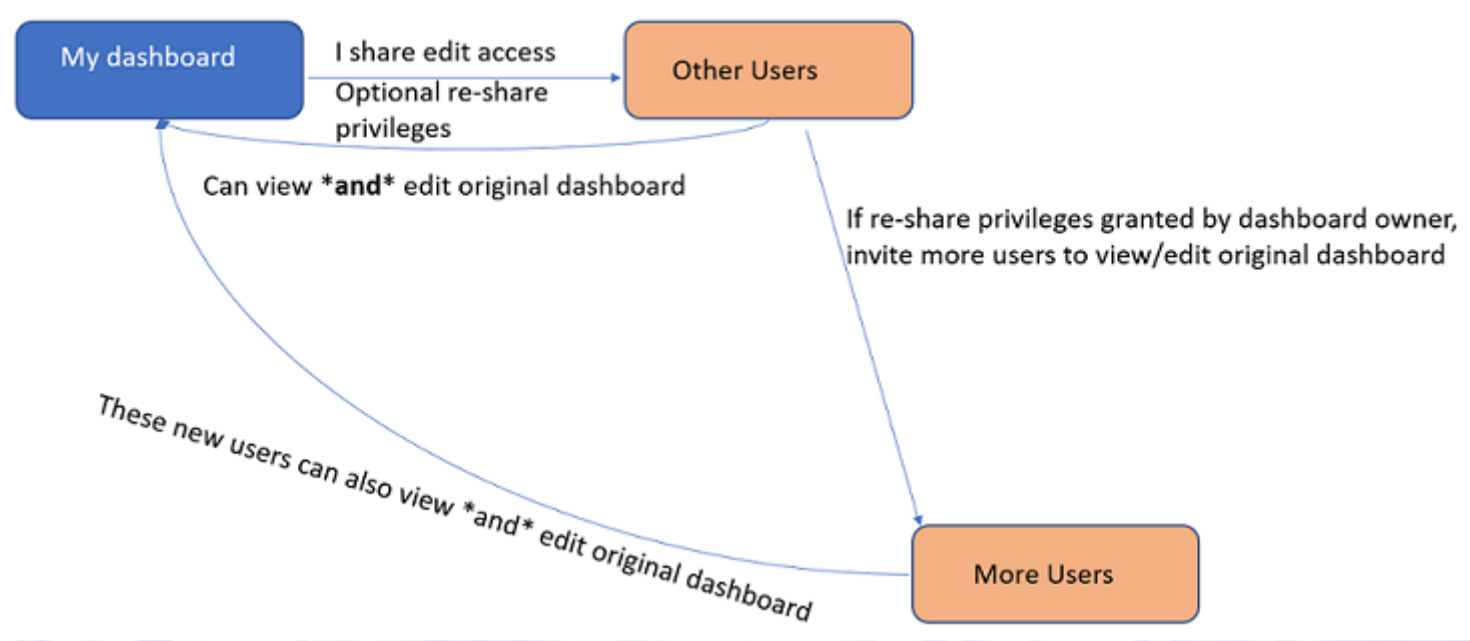

You can also share (or reshare) multiple dashboards simultaneously on the dashboard index page.

Shared Dashboards (cont'd)

GDA Corp.

When sharing a dashboard, you can elect to give **edit** and **reshare** privileges to sharees

Dashboard Widget Controls

GDA Corp.

The screenshot shows a dashboard widget with the following controls and annotations:

- Alert settings:** A checkbox labeled "No alert set" with an arrow pointing to it.
- Edit filter settings:** A button with a funnel icon and an arrow pointing to it.
- Copy widget to another dashboard:** A button with a copy icon and an arrow pointing to it.
- Move widget to top of dashboard:** A button with an upward arrow and an arrow pointing to it.
- Move widget to bottom of dashboard:** A button with a downward arrow and an arrow pointing to it.
- Close widget for now:** A button with a close icon and an arrow pointing to it.
- Delete widget from dashboard:** A button with a trash icon and an arrow pointing to it.
- Full-screen preview:** A button with a full-screen icon and an arrow pointing to it.
- Save widget as PNG image:** A button with a save icon and an arrow pointing to it.
- Resize widget (drag and drop):** A button with a resize handle icon and an arrow pointing to it.

The widget displays a bar chart titled "US State Corn Area Planted" with the following data:

Location	Corn Area Planted (kha)
Illinois	4800
Indiana	2400
Iowa	5500
Kansas	1600
Minnesota	3300
Missouri	1400
Nebraska	3800
Ohio	1500
South Dakota	2300
Wisconsin	1600

Custom Text Widgets

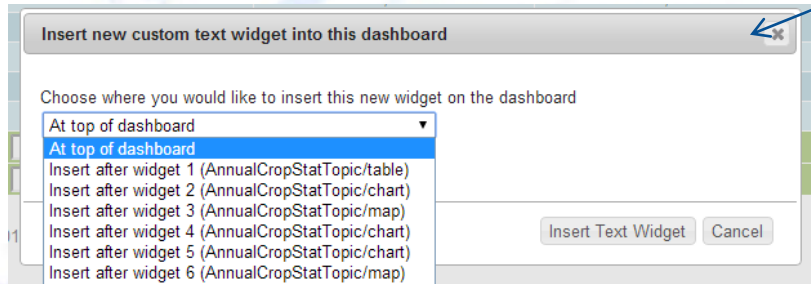

GDA Corp.

Click to insert new editable text widget onto dashboard

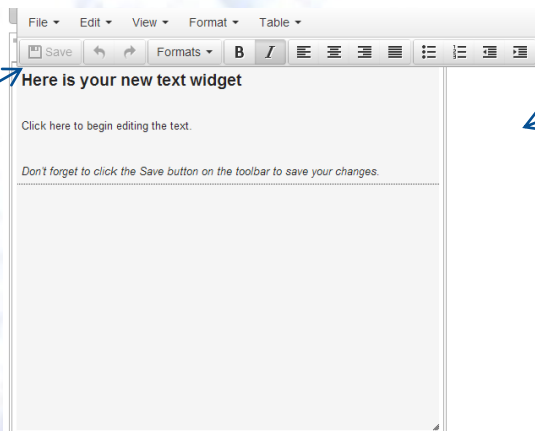

My default dashboard *

On dialog box, pick where to insert new widget and click 'Insert Text Widget' button

Dashboard will reload with new widget. Click on the text to open text editing options

Press Save button to preserve changes

Topics

Snapshot

Annual Crop Stats

Monthly Crop Stats

GDA Crop NDVI

Crop Progress/Condition

Trade Stats

Weather

Reports

Crop Calendar

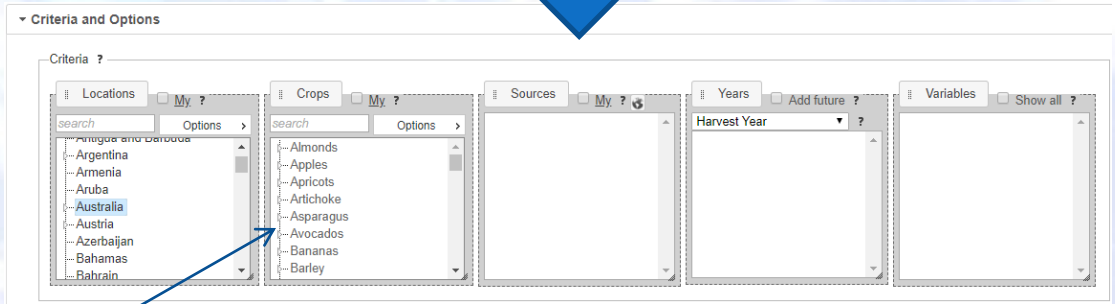

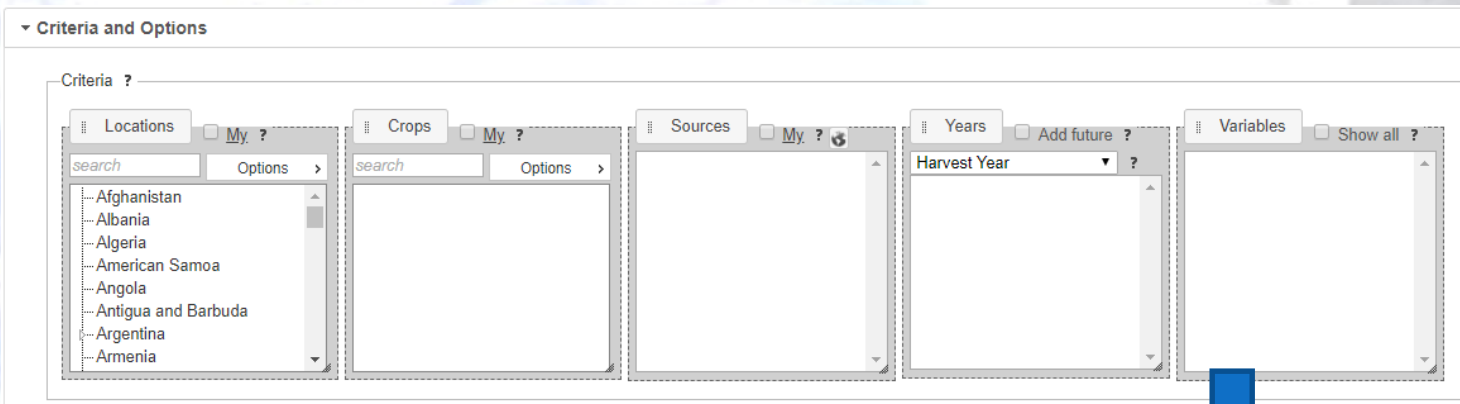

- **A Topic is where the database can be filtered and widgets generated**
- **Database organized thematically by 'Topic'**
- **Generated widgets can be saved to dashboards**
- **Topic Examples (Your topic list may vary):**
 - **Snapshot**
Basic topic that shows "current" stats for specific country and crop
 - **Annual Crop Stats**
Analyze national/subnational crop data for comparison between countries/global regions or for sub-national administrative divisions within a particular country
 - **Monthly Crop Stats**
Stats for crops that produce monthly (e.g., Palm Oil)
 - **GDA Crop NDVI**
View 8-day aggregated NDVI time-series data
 - **Crop Progress/Condition**
Weekly crop progress and condition statistics
 - **Trade Stats**
Annual crop trading statistics from origin countries to destination countries
 - **Weather**
View temperature, precipitation and growing-degree values over time by week or month
 - **Reports**
Search our catalog of third-party PDF reports
 - **Crop Calendar**
View typical and/or annual season window or crop stage windows for crops and locations

Topic Criteria Example

Filters are organized into sequential dropdowns in left-to-right order

- a selection to the left determines available options in all subsequent filters
- *e.g.*, if location is selected in left most filter box, then list of available crops for that location will be updated for selection

Crops available for Australia

Topic Criteria Example (cont'd)

You can by default subset available locations, crops and data sources to a preferred list by setting 'My Countries', 'My Crops', and 'My Sources' under account settings. Doing so will auto-subset the available options in the corresponding filter boxes by default, but you can uncheck the 'My' checkbox to revert to all available selections at any time.

Criteria and Options

Criteria ?

The screenshot shows a user interface with several filter boxes. The 'Locations' box is expanded, showing a search bar and a list of countries including Afghanistan, Albania, Algeria, American Samoa, Angola, Antigua and Barbuda, Argentina, and Armenia. The 'Options' menu is visible next to the search bar. The other filter boxes (Crops, Sources, Years, Variables) are partially visible and have 'My ?' checkboxes.

You can opt to hide our Level 2 or Level 3 Administrative Unit levels (e.g., hide US districts (L3) so that counties appear directly below states) in Options menu

You can perform a text search of our location database by entering a string, then press tab (or click outside box)

Topic Criteria Example (cont'd)

GDA Corp.

Click 'My' to jump to user settings to pre-select 'favorite' countries (or crops or sources)

Choose 'favorite' countries

Reload topic with a location filter and 'My' is automatically selected and only 'favorite' countries appear in the filter

Locations My ?

search Options >

- ... Afghanistan
- ... Albania
- ... Algeria
- ... American Samoa
- ... Angola
- ... Antigua and Barbuda
- ... Argentina
- ... Armenia

My Countries

Click in the box to add a new selection

Argentina x Australia x

Brazil x Canada x

Paraguay x United States x

Afghanistan

- Albania
- Algeria
- American Samoa
- Andorra
- Angola
- Anguilla
- Antarctica
- Antigua and Barbuda
- Argentina

Locations My ?

search Options >

- ... Argentina
- ... Australia
- ... Brazil
- ... Canada
- ... Paraguay
- ... United States

You can uncheck the 'My' checkbox to always go back to the full list of locations

This same methodology also applies to Crop and Source filters as well

Topic Criteria Example (cont'd)

GDA Corp.

If sub-national data is available, you can expand locations to select those

You can grab resizer to make filter box larger

You can choose to hide Level 2 or Level 3 locations (under the Options menu). In this example, Level 3 (District) locations are hidden and all Level 4 locations (counties) are under their parent Level 2 location (State)

Use the search facility to search for locations by name

Topic Criteria Example (cont'd)

Options Menu

Show 'Total For Crop' only, or all practices
Ungroup crops

Criteria and Options

Criteria ?

Locations My ?

Crops My ?

Sources My ?

Years Add future ?

Variables Show all ?

Options

- Group crops
- Crop Practices
 - Only 'Total For Crop'
 - Show all practices
- Auto-select group
 - Auto-select grouping
- Save as new grouping...

Year Mode

- Harvest Year
- Plant/Harvest Year
- Market Year (USDA)
- Market Year (USDA split)

Choose what mode of year representation from:

Production Year (default) -- also called Market Begin Year or Harvest Year, this represents the calendar year when the harvest begins. All the data in the database contain a production year.

We also support the **Market Year** and the **Market Year (split)**, also called the Local Marketing Year, though not all crop types have this information available yet. The Market Year follows the USDA guidelines where the first year of the split year includes the production from the northern hemisphere, while the second year includes the southern hemisphere.

The **Plant/Production year** option indicates the year of the beginning of the production season (generally planting for seasonal crops), in addition to the production year (if these are the same, the year is repeated, e.g. 2014/14)

** If using the Market Year or Plant/Production Year and the data you are selecting is not available, try using the Production Year as this is global.*

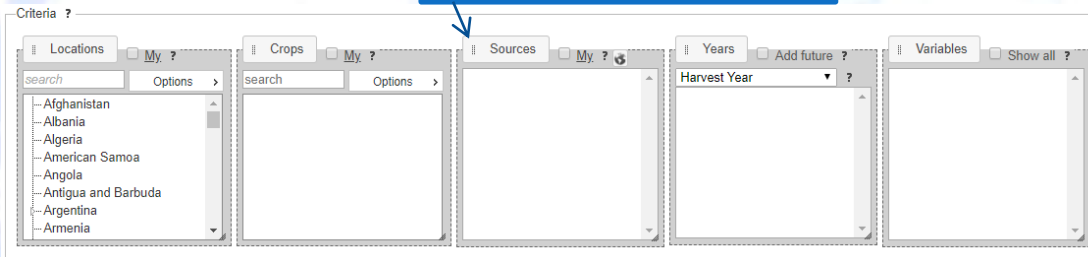

Topic Criteria Example (cont'd)

GDA Corp.

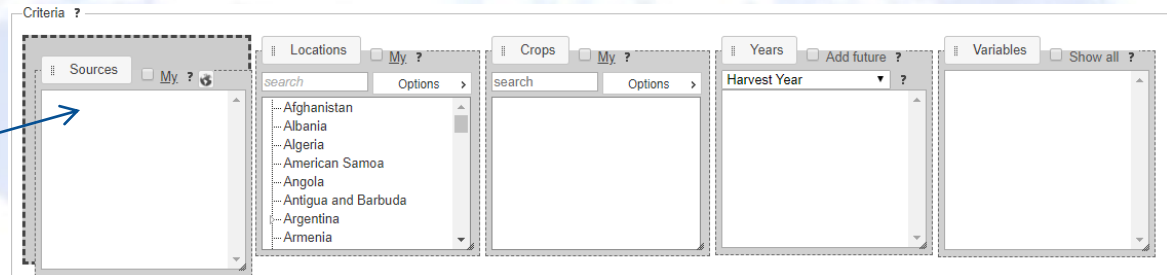

Filters can be re-ordered to prioritize one over another
- Click-and-grab handle next to criteria title and drop in desired position

For example, to search first by source, grab source and drop in left most position

1. Grab Source handle

2. Drop into first position

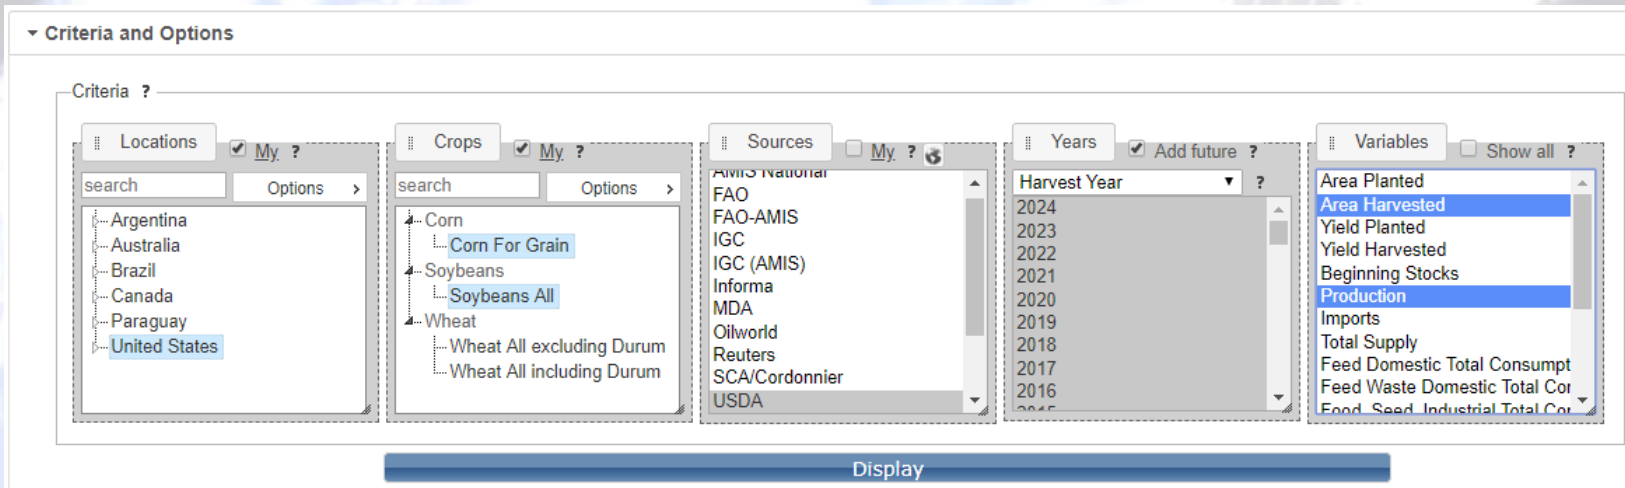

Source options reload with all available sources since its in first position

Topic Criteria Example (cont'd)

After all desired selections have been made, press 'Display' button to show the results in a widget.

Good Practice TIP: While we don't currently restrict the number of filter selections, it is wise to restrain selections to a few items per box (and if you use many selections in one box, use one or two in the others). Otherwise, results are slow and widgets may contain too much data to be visualized properly.

Data Filters

In addition, topics allow custom variable filters to be added to constrain results to particular criteria for up to three variables

- Select the variable, operator and enter a comparison value
- Multiple filters are applied using AND logic, *i.e.*, they must all be true for the result record to be included

The screenshot shows a 'Data Filters (optional)' section with three rows of filter criteria. The first row is populated with 'Production (kmt)', '>', and '10000'. Annotations with arrows point to these elements: 'Variable to be filtered' points to the dropdown menu, 'Comparison operator (greater than)' points to the '>' symbol, and 'Comparison value (10,000 kmt)' points to the '10000' text. A fourth arrow points to the 'x' button in the first row, labeled 'Remove filter'.

Variable to be filtered	Comparison operator (greater than)	Comparison value (10,000 kmt)	Remove filter
Production (kmt)	>	10000	x
			x
			x

Unit Controls

Agricultural statistics can be displayed in two unit systems:

- Metric (tonnes, hectares)
- US Customary (bushels, lbs, acres)

You can specify your preferred default unit system in your account settings

Units ?

Unit system	<input type="text" value="Metric"/>
Area scale	<input type="text" value="Thousands"/>
Quantity scale	<input type="text" value="Thousands"/>
Yield scale	<input type="text" value="[None]"/>

Choose which system to display the results in

For each type of attribute, you can select the scale to show values in hectares, 1 hectares, M hectares, etc

Topics Widget Controls

Save widget to a dashboard

Maximize in popup window

Export as PNG

Remove from results

Resize widget (drag and drop)

Choosing Display Variables

GDA Corp.

In addition to the primary variables (*e.g.*, Area Harvested, Yield Harvested, Production, Imports, *etc.*), we have calculated derived fields that can be included such as 5/10 year averages, and deltas or percent change from Prior Year, 5 YR AVG, 10 YR AVG, *etc*

The Displayed Variables button on the pivot toolbar opens a dialog where you can select those to include

Pivot on Location, Source: **Displayed Variables...** Custom Variables...

Custom Variables

Users can add custom variables “columns” that are formulas using other column values
 You must pivot the widget first to arrange data into appropriate columns

For example, let’s say we want to compare USDA QuickStats and USDA Census State level production for Corn For Grain in 2012

Location	Crop	Source	Harv. Yr	Production (k-mt)
Alabama	Corn For Grain [Total For Crop]	USDA	2012	734
Alabama	Corn For Grain [Total For Crop]	USDA NASS Census	2012	660
Arizona	Corn For Grain [Total For Crop]	USDA	2012	159
Arizona	Corn For Grain [Total For Crop]	USDA NASS Census	2012	150
Arkansas	Corn For Grain [Total For Crop]	USDA	2012	3,142
Arkansas	Corn For Grain [Total For Crop]	USDA NASS Census	2012	3,167
California	Corn For Grain [Total For Crop]	USDA	2012	823
California	Corn For Grain [Total For Crop]	USDA NASS Census	2012	811
Colorado	Corn For Grain [Total For Crop]	USDA	2012	3,412
Colorado	Corn For Grain [Total For Crop]	USDA NASS Census	2012	3,074
Connecticut	Corn For Grain [Total For Crop]	USDA NASS Census	2012	20

Georgia	Corn For Grain [Total For Crop]	USDA	2012	1,417

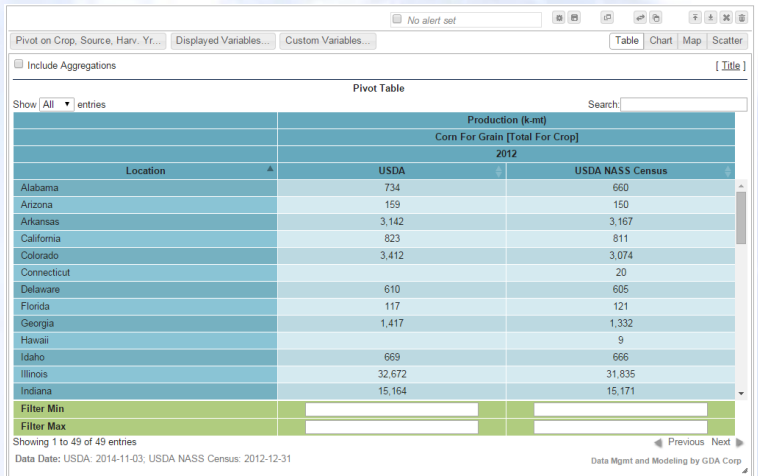

Choose which variables to 'pivot' on

Select variables that you would like to "pivot" on, i.e., use to distinguish columns rather than rows. You can de-select all the options to not pivot on any. Note that if you change the pivot selection, this will remove any custom variables you have added.

- Location
- Crop
- Source
- Harv. Yr

Choose to pivot on variables including Source so that sources will appear in separate columns

Build pivot in topic with US State data for 2012 Corn For Grain for both USDA and USDA Census

Location	Production (k-mt)	
	Corn For Grain [Total For Crop]	
	USDA	USDA NASS Census
Alabama	734	660
Arizona	159	150
Arkansas	3,142	3,167
California	823	811
Colorado	3,412	3,074
Connecticut	20	20
Delaware	610	605
Florida	117	121
Georgia	1,417	1,332
Hawaii	9	9
Idaho	669	666
Illinois	32,672	31,835
Indiana	15,164	15,171

Continued ...

Custom Variables (cont'd)

Click "Custom Variables" button to open Custom Variables dialog box, click "Add new variable"

Supply a variable name, unit label and an optional formatting (thousands, percentage)

Enter variable expression, using the shorthand notations from the table on the right

The 'Add custom variable' dialog box contains the following fields and a table:

- Name:** USDA v Census
- Unit label:** % (e.g. MT, kha, %)
- Round result:** 1 digit
- Format as:** percentage (*100)
- Expression (e.g. A1 + B1):** (A1-B1)/B1

Expression rules:
Variables from table to the right are acceptable, use the shortcut notation (e.g. A1)
Numbers are acceptable (decimal notation, no comma separators)
Parenthetical notation is allowed (make sure all parenthesis are closed in proper order)
Mathematical operators are allowed (e.g. +, -, *, /)
No other symbols, letters or words can be used

Variables Available for use in Expressions	
A1	Production (Com For Grain [Total For Crop], USDA, 2012)
B1	Production (Com For Grain [Total For Crop], USDA NASS Census, 2012)
C1	Production Prior Year (Com For Grain [Total For Crop], USDA, 2012)
D1	Production Prior Year (Com For Grain [Total For Crop], USDA NASS Census, 2012)
E1	Production % Change YOY (Com For Grain [Total For Crop], USDA, 2012)
F1	Production % Change YOY (Com For Grain [Total For Crop], USDA NASS Census, 2012)
G1	Production 5 YR AVG (Com For Grain [Total For Crop], USDA, 2012)
H1	Production 5 YR AVG (Com For Grain [Total For Crop], USDA NASS Census, 2012)
I1	Production % Change 5 YR AVG (Com For Grain [Total For Crop], USDA, 2012)
J1	Production % Change 5 YR AVG (Com For Grain [Total For Crop], USDA NASS Census, 2012)
K1	Production 10 YR AVG (Com For Grain [Total For Crop], USDA, 2012)
L1	Production 10 YR AVG (Com For Grain [Total For Crop], USDA NASS Census, 2012)
M1	Production % Change 10 YR AVG (Com For Grain [Total For Crop], USDA, 2012)
N1	Production % Change 10 YR AVG (Com For Grain [Total For Crop], USDA NASS Census, 2012)
O1	Production Linear Trend (Com For Grain [Total For Crop], USDA, 2012)
P1	Production Linear Trend (Com For Grain [Total For Crop], USDA NASS Census, 2012)
Q1	Production Parent Location (Com For Grain [Total For Crop], USDA, 2012)
R1	Production Parent Location (Com For Grain [Total For Crop], USDA NASS Census, 2012)
S1	Production Parent Location Prior Year (Com For Grain [Total For Crop], USDA, 2012)
T1	Production Parent Location Prior Year (Com For Grain [Total For Crop], USDA NASS Census, 2012)
U1	Production % Change Parent Location Prior Year (Com For Grain [Total For Crop], USDA, 2012)
V1	Production % Change Parent Location Prior Year (Com For Grain [Total For Crop], USDA NASS Census, 2012)
W1	Production Parent Location 5 YR AVG (Com For Grain [Total For Crop], USDA, 2012)
X1	Production Parent Location 5 YR AVG (Com For Grain [Total For Crop], USDA NASS Census, 2012)
Y1	Production % Change Parent Location 5 YR AVG (Com For Grain [Total For Crop], USDA, 2012)

Custom Variables (cont'd)

Custom variable appears as a new column, in this case showing the percent difference from NASS QuickStats and NASS Census data

The custom variable is also available on the other widget types

Data Mgmt and Modeling by GDA Corp

Chart Widgets

Choose X-axis variable

Change chart type

Format how each series is displayed

Change legend position (or hide)

Click series title to show/hide entries

Override widget title/subtitle

Click-and-drag left or right on chart area to zoom into a selected portion of x-axis domain (a Reset Zoom button will appear to return to full view)

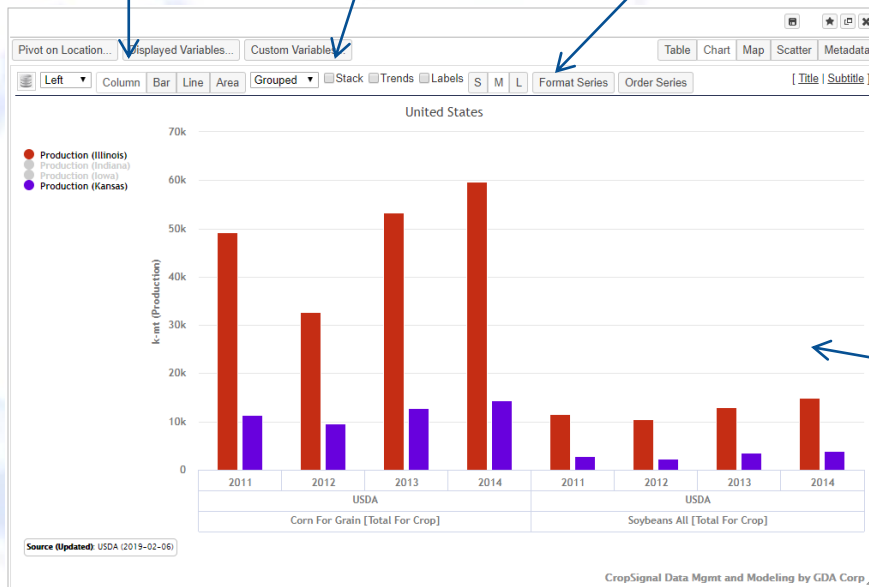

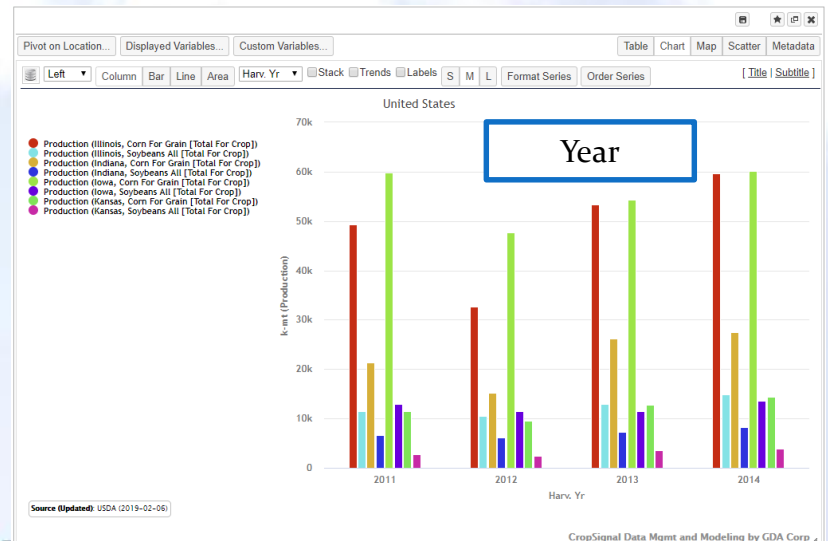

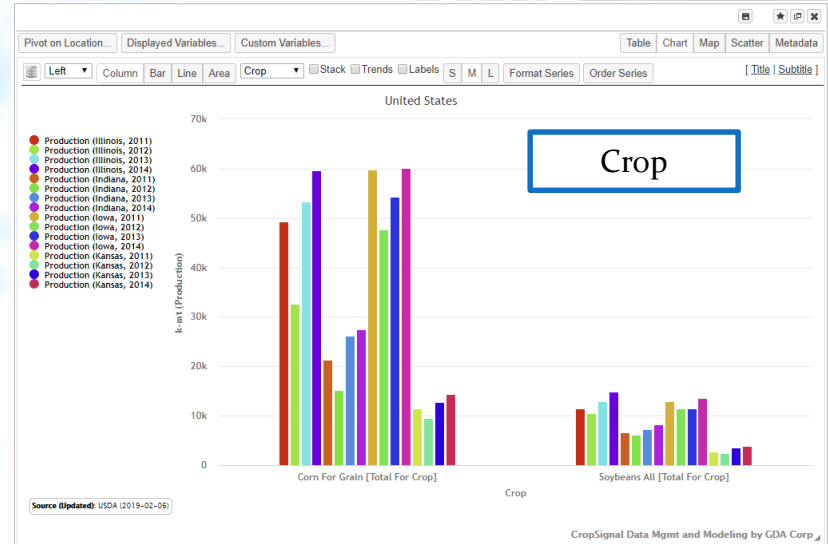

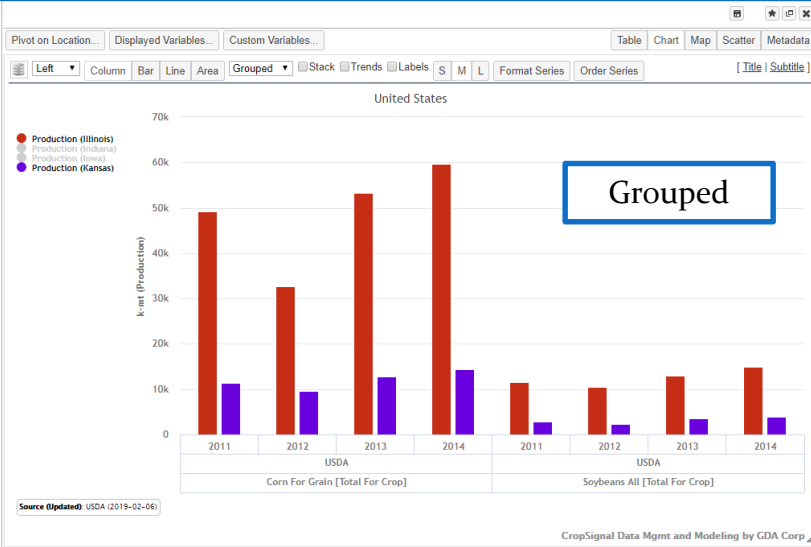

Chart Widget X-Axis Options

GDA Corp.

You can select the 'Grouped' option or any non-pivoted variable as X-axis. Pivoted variables distinguish series apart.

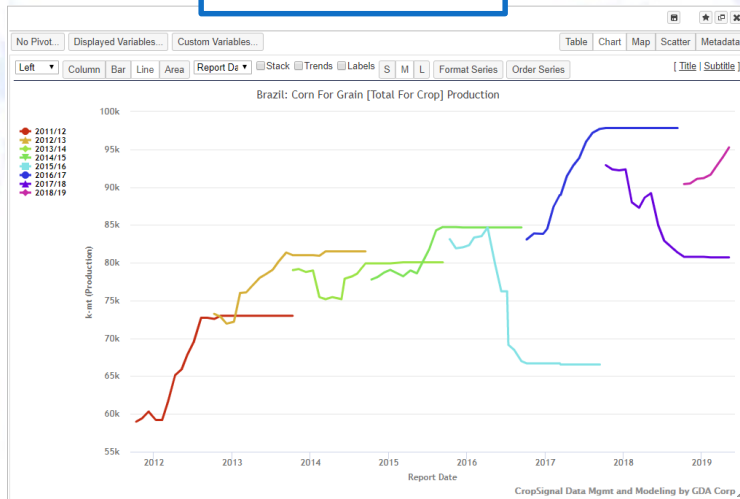

X-Axis Date Format

GDA Corp.

If charting data by date on the X-axis, the format of the date affects the chart's appearance
Applies to sub-annual forecasts on Annual Crop Stats, Crop Progress/Condition, GDA Crop NDVI and Weather

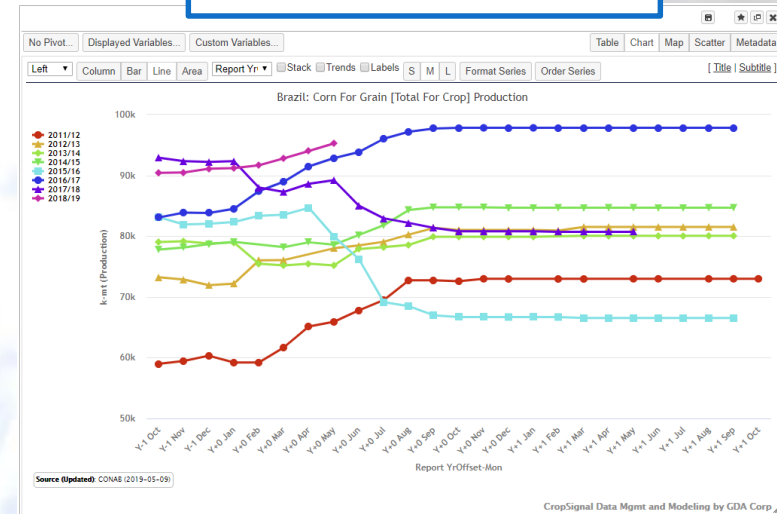

YYYY-MM-DD

Most recent only/All data

Show all available estimates ▼
 YYYY-MM-DD (e.g. "2015-08-20") ▼

Forecast Year Offset-Month

Most recent only/All data

Show all available estimates ▼
 Forecast Year Offset-Month (e.g. "Y-1 Jun" mean) ▼

Since Year is included in date format, the x-axis will span all the years covered by the dates

This is the same data, but the dates are formatted across the same domain without the year. Therefore you get a season-over-season chart. Also, this can handle scenarios where the available dates for a given season spans more than one year.

Chart Widget Types

GDA Corp.

You can choose between the different types of charts

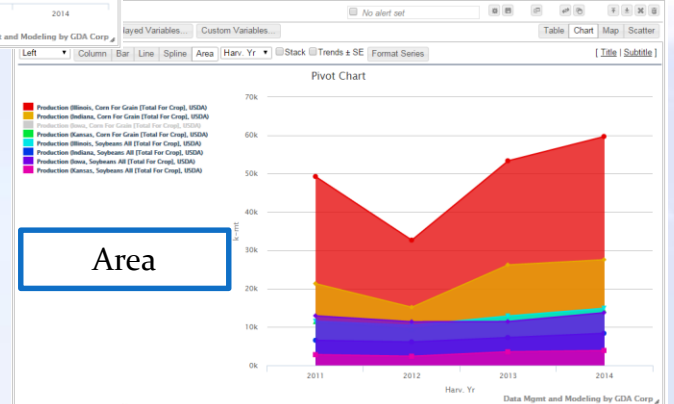

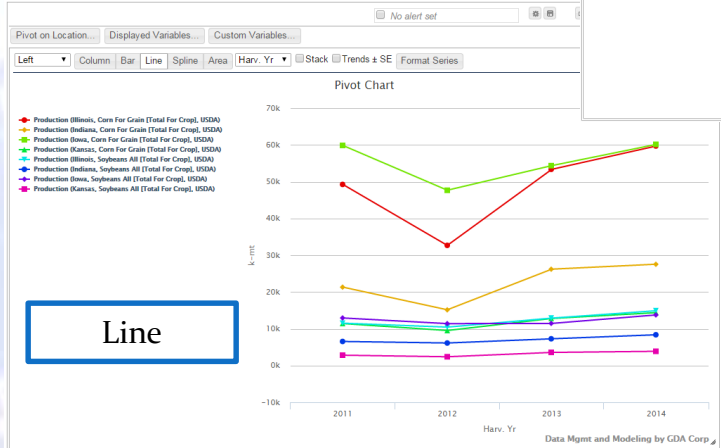

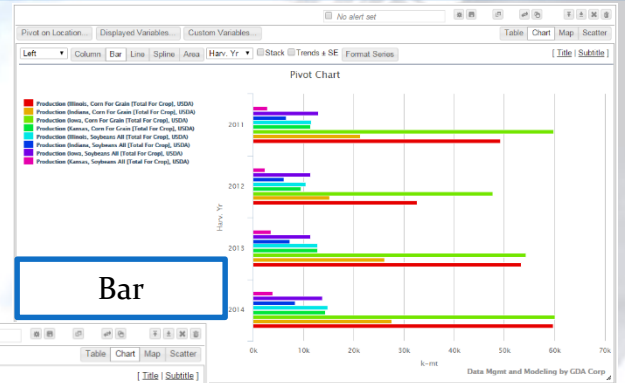

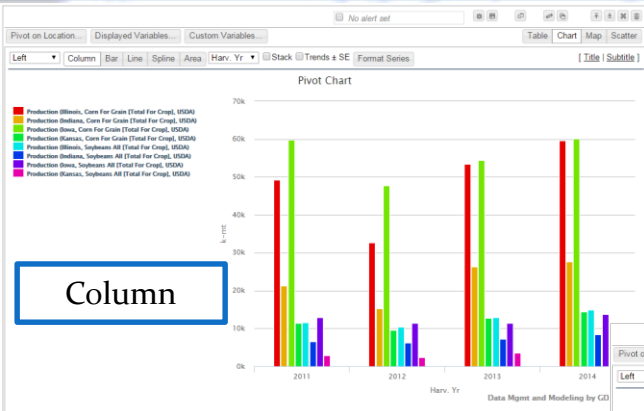

Chart Widget Series Stacking

GDA Corp.

You can use the stacking feature to stack series together

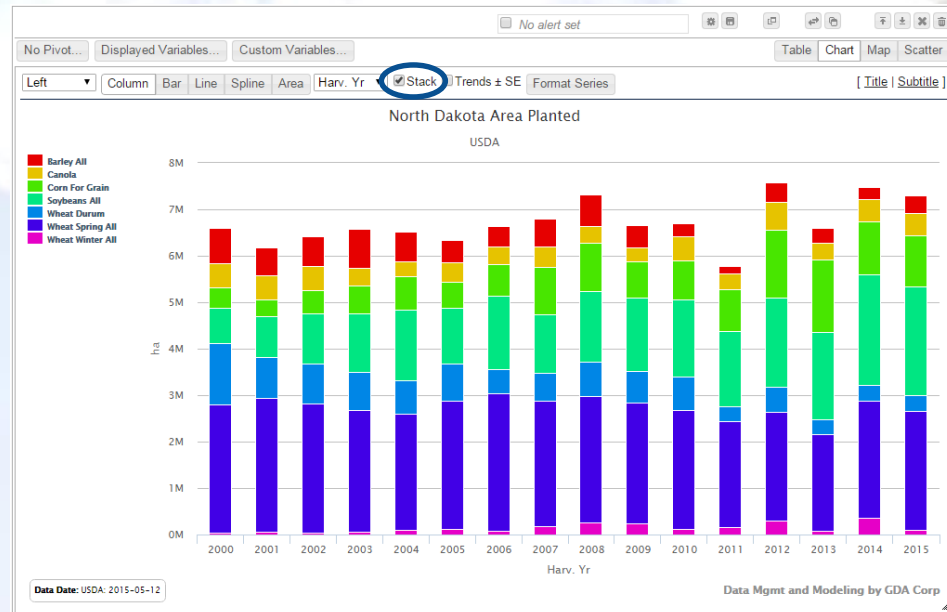

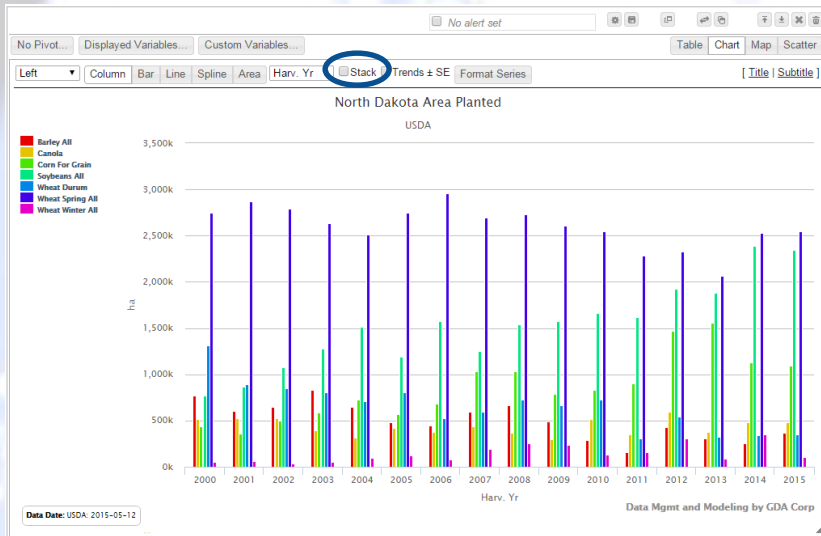

Chart Widgets - Trendlines

GDA Corp.

You can add a linear trend with standard error boundaries

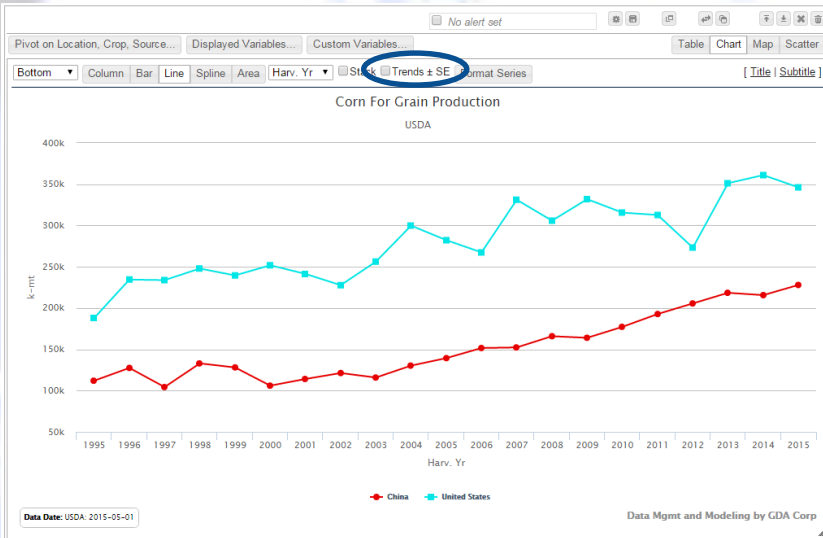

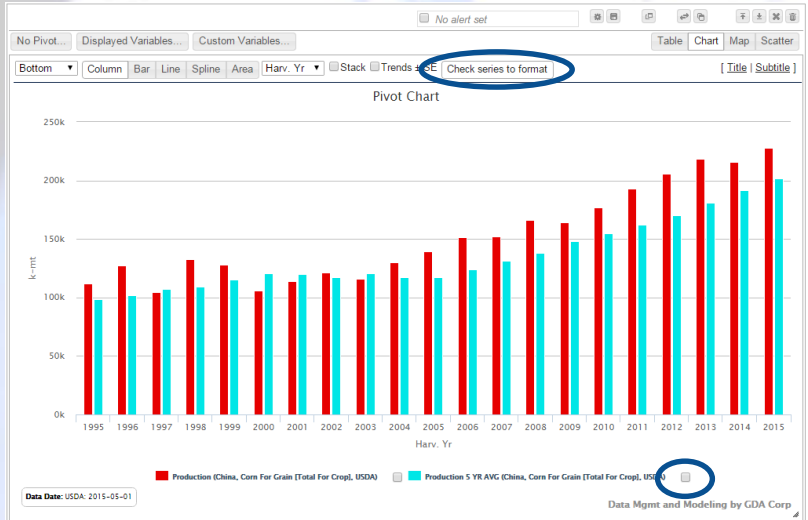

Chart Widgets Formatting

You can customize individual series formatting by clicking the Format Series button and then the checkbox next to the series to format

The 'Format Chart Series' dialog box allows for the customization of a chart series. The 'Name' field is set to '5 YR AVG'. The 'Series type' is set to 'Line'. The 'Color' is set to a custom color with the hex code '#996633' (displayed as 'rgba(152, 88, 76, 1)'). The 'Dash style' is set to 'ShortDash'. The 'Line Width' is set to '5'. The 'Markers' checkbox is unchecked, and the 'Marker style' is set to 'Auto'. The 'Save' and 'Cancel' buttons are at the bottom.

Override series name

Override series type (mix and match types)

Customize color/opacity

Customize Marker/Line styles

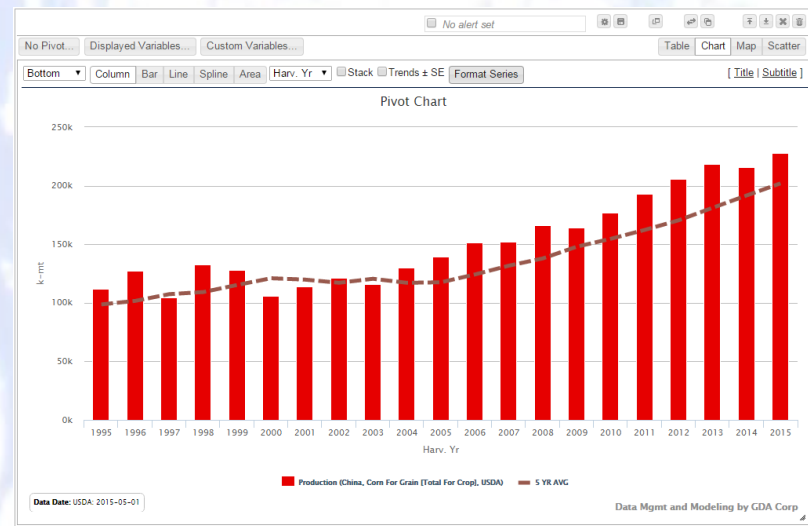

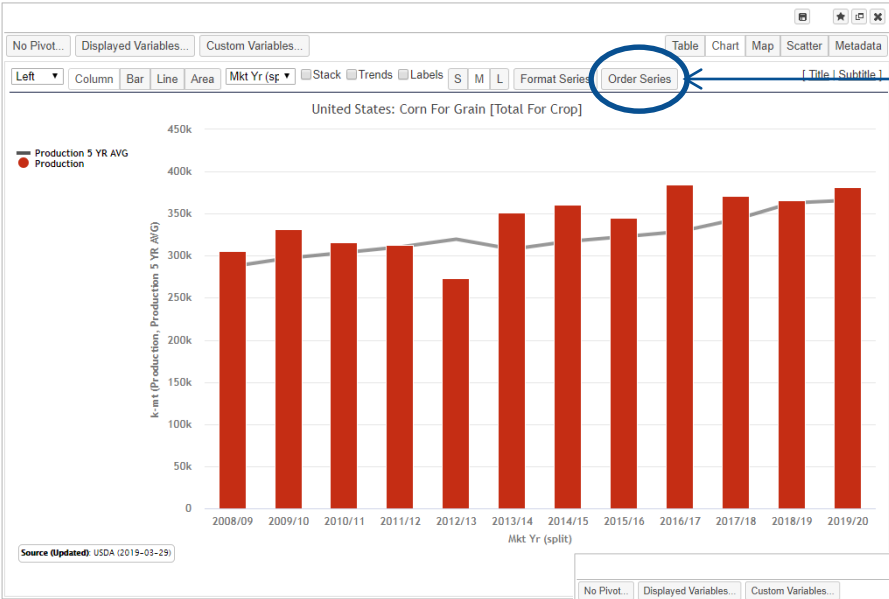

Chart Widget Series Order

GDA Corp.

You can customize the order that series are rendered on the chart series

1. Click 'Order Series' button

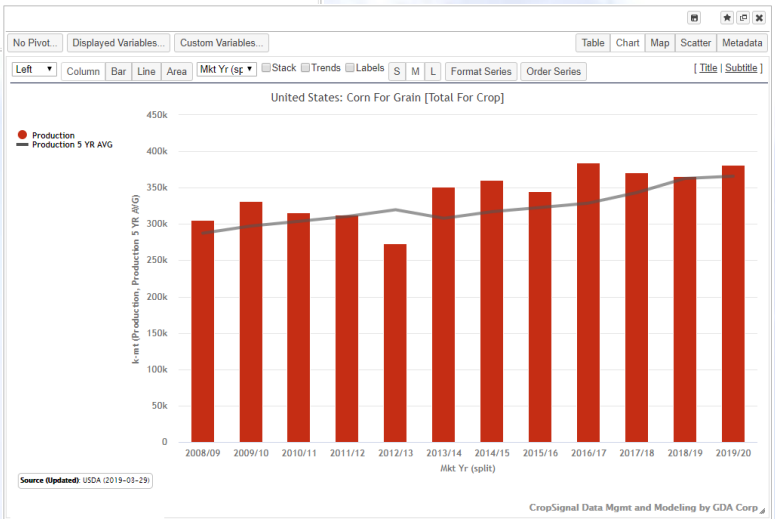

5 Yr Avg rendered first (and thus below) the production columns

2. In Dialog Box, click and drag series into desired order, then click 'Save'

3. Chart series are re-ordered with 5 Yr Avg line rendered on top of columns

Map Widgets

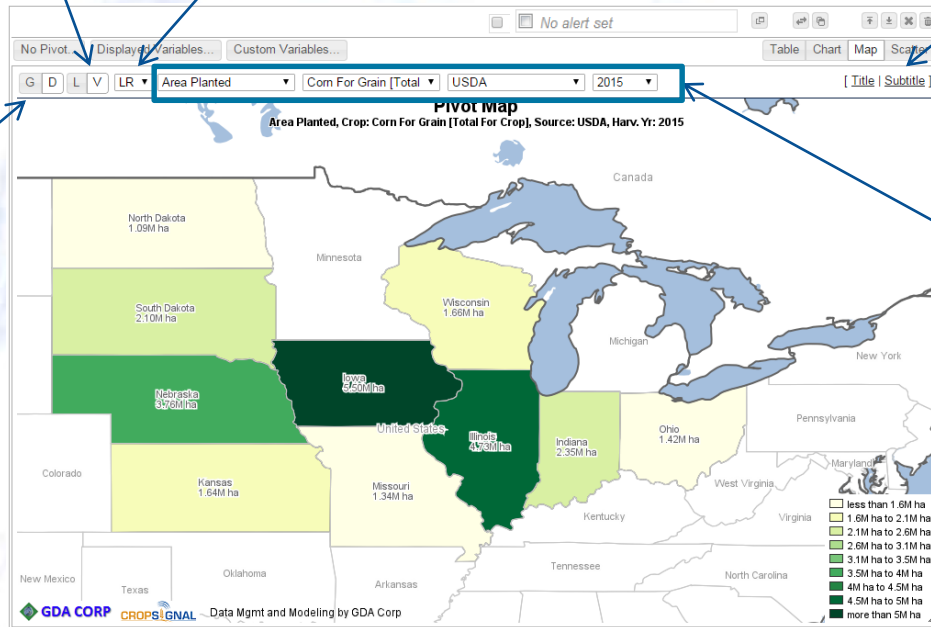

Maps only show one value at a time across multiple locations
Maps only appear if multiple locations were selected

Label mapped locations:
L = Location name
V = Location & Value

Position of legend (or turn off)

Override widget title/subtitle (erase title to reset to auto-generated one)

Global (G) vs Dynamic (D) classification:
Global is fixed scale per variable
Dynamic is calculated based on data being mapped

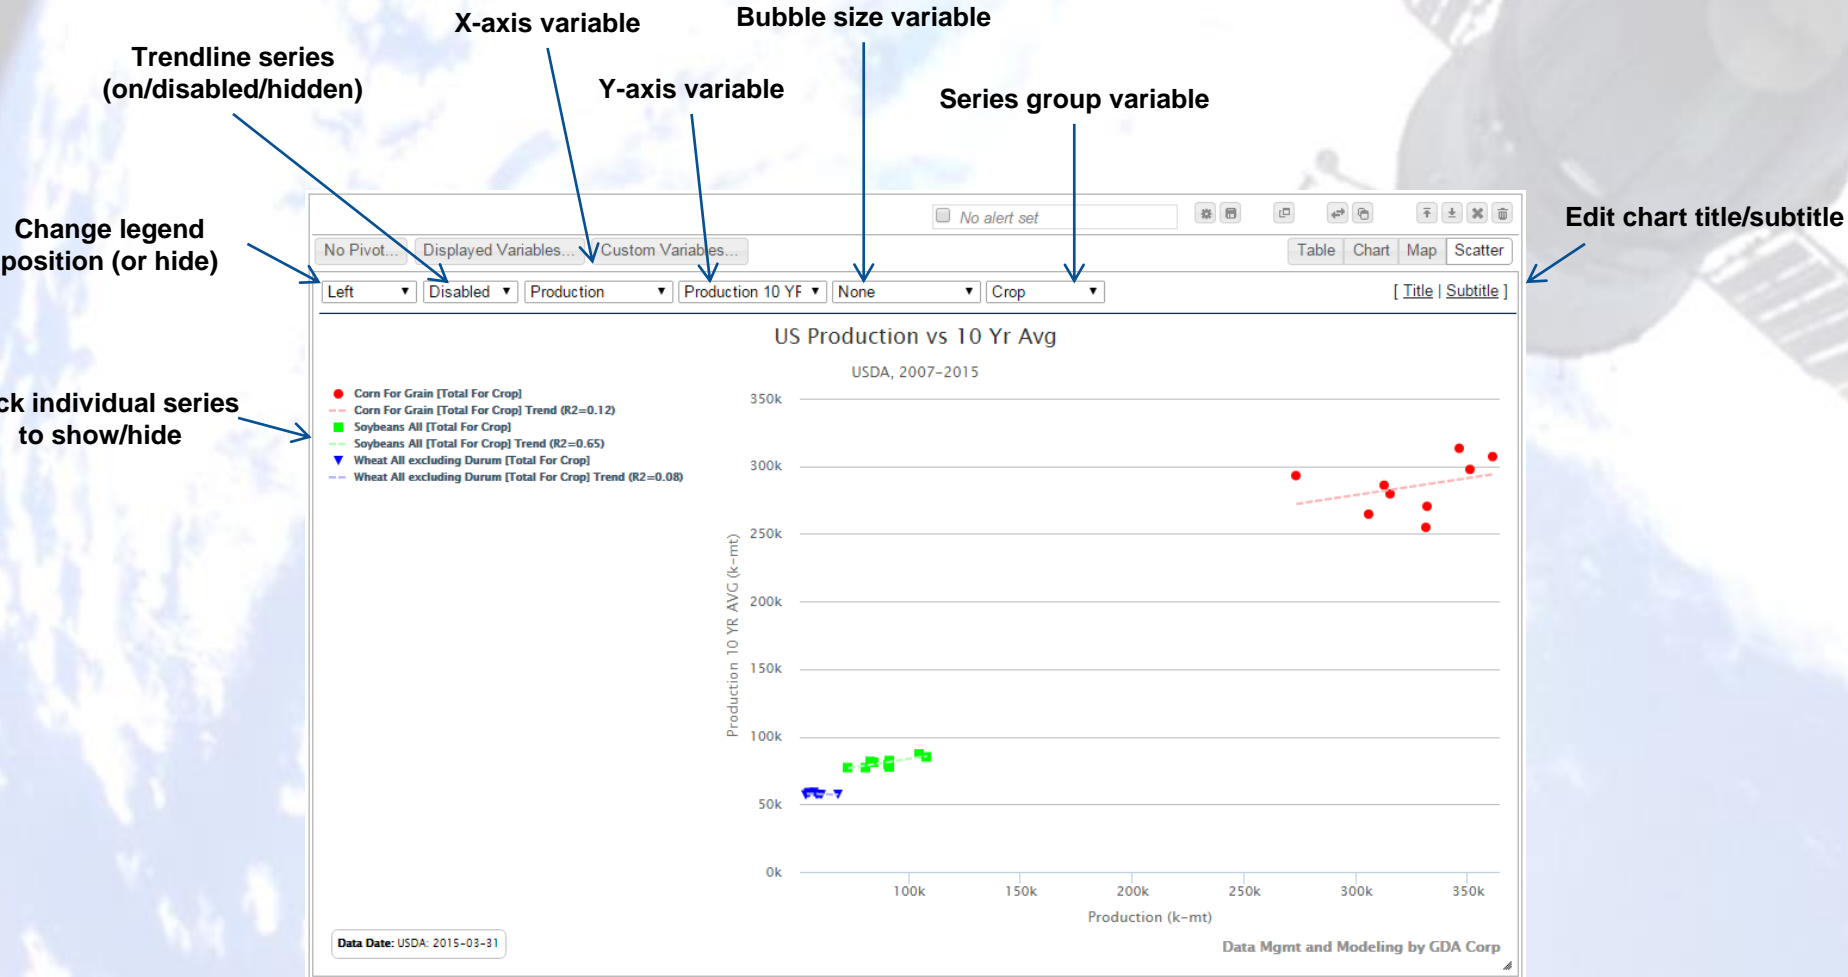

These dropdowns are populated with selections from Topic dropdowns (if more than one option was selected) and can change the data being displayed in the map

Scatter Widgets

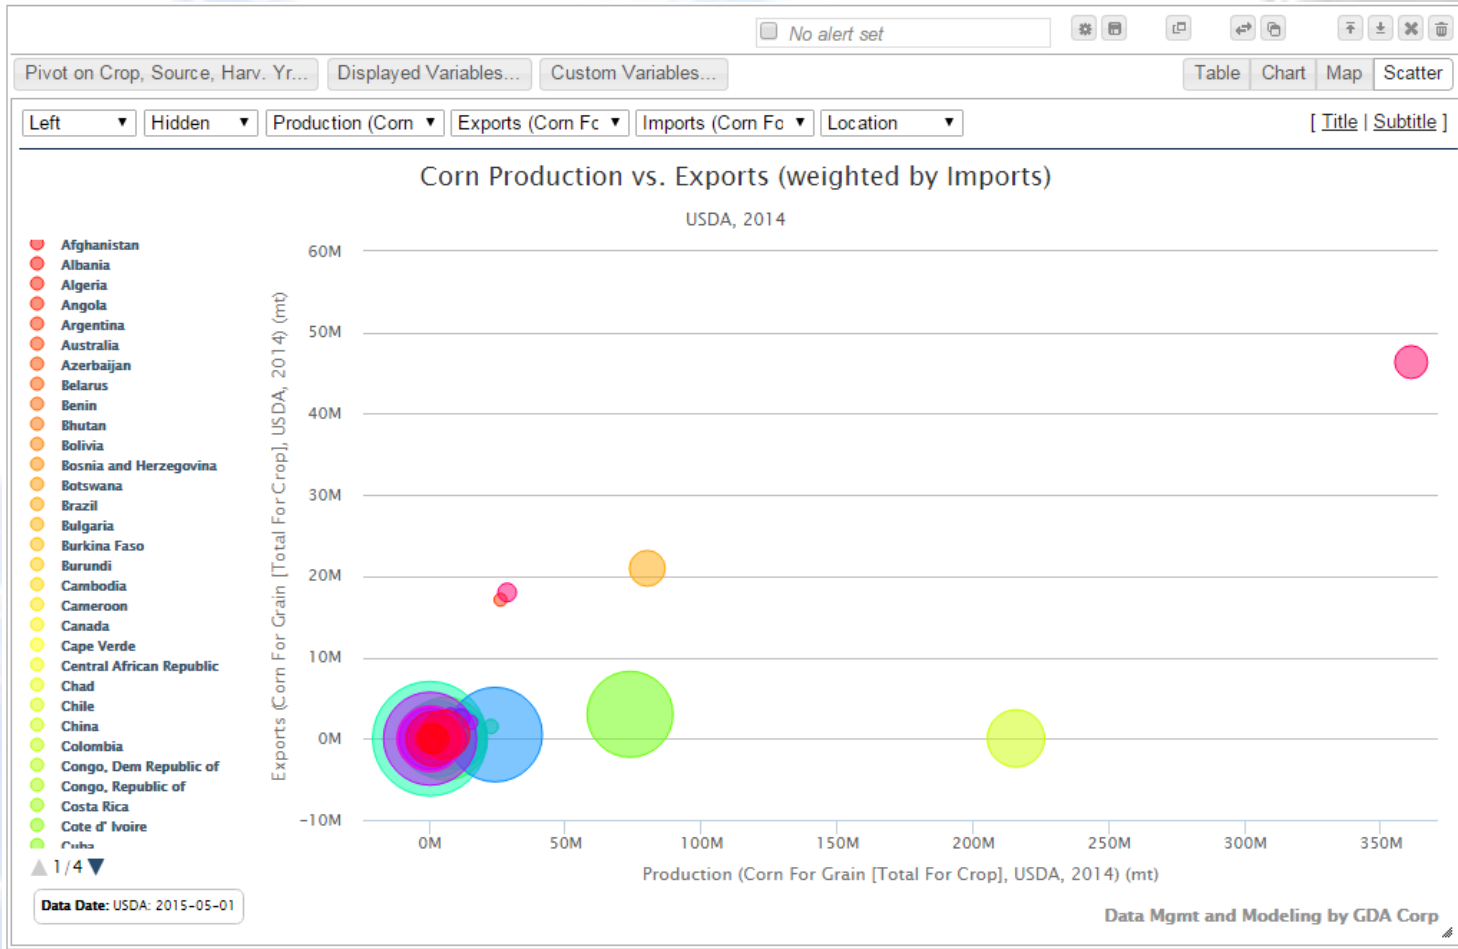

By default, scatter charts allow you to select one variable for the X-axis, a second for the Y-axis and (optionally) a third for the bubble size. You can use a reference variable (Location/Crop/Year) to distinguish series types (Crop in example below)

Scatter Widgets (cont'd)

Another example showing Production on X-Axis, Exports on Y-axis and Imports as Bubble Size
Series are grouped by Location

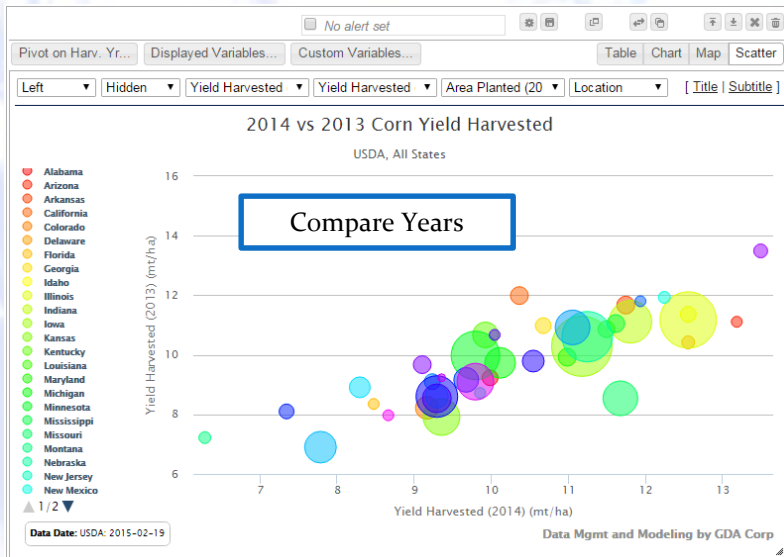

Scatter Widgets (cont'd)

GDA Corp.

Use Pivoting to compare across reference variables

[Russia Goes after Nestle over Discovery of GMO Papaya in Its Breakfast Cereals](#)
Tue May 21 2019
Russia's consumer rights protection watchdog Rospotrebnadzor has filed an administrative violation case against Nestle Russia after finding genetically modified papaya in the company's instant cereals oatmeal porridge. According to Rospotrebnadzor, the manufacturer knew about the non-compliance of its Bystrov brand ingredients with the mandatory requirements and did not inform the watchdog about that. Source: www.rt.com/business/459817-russia-
